Ecma International is an industry association founded in 1961, dedicated to the standardization of information and communication systems.

Ecma has been involved in the development of the concept of “fast tracking” in ISO/IEC JTC 1 and, since its introduction in 1986, it has been one of the main practitioners of it.

Ecma is driven by industry to meet the needs of industry, generating a healthy competitive landscape based on differentiation of products and services, rather than technology models, generating confidence among vendors and users of new technology. About ECMA

List of Standards
