

• Session 2. Capabilities – what are the key tools systems engineers can bring to bear to meet stakeholder needs?

DISCUSSION GOAL: catalog the modeling capabilities that can be applied to improve effectiveness and efficiency and identify the key systems in healthcare that can be impacted by these capabilities

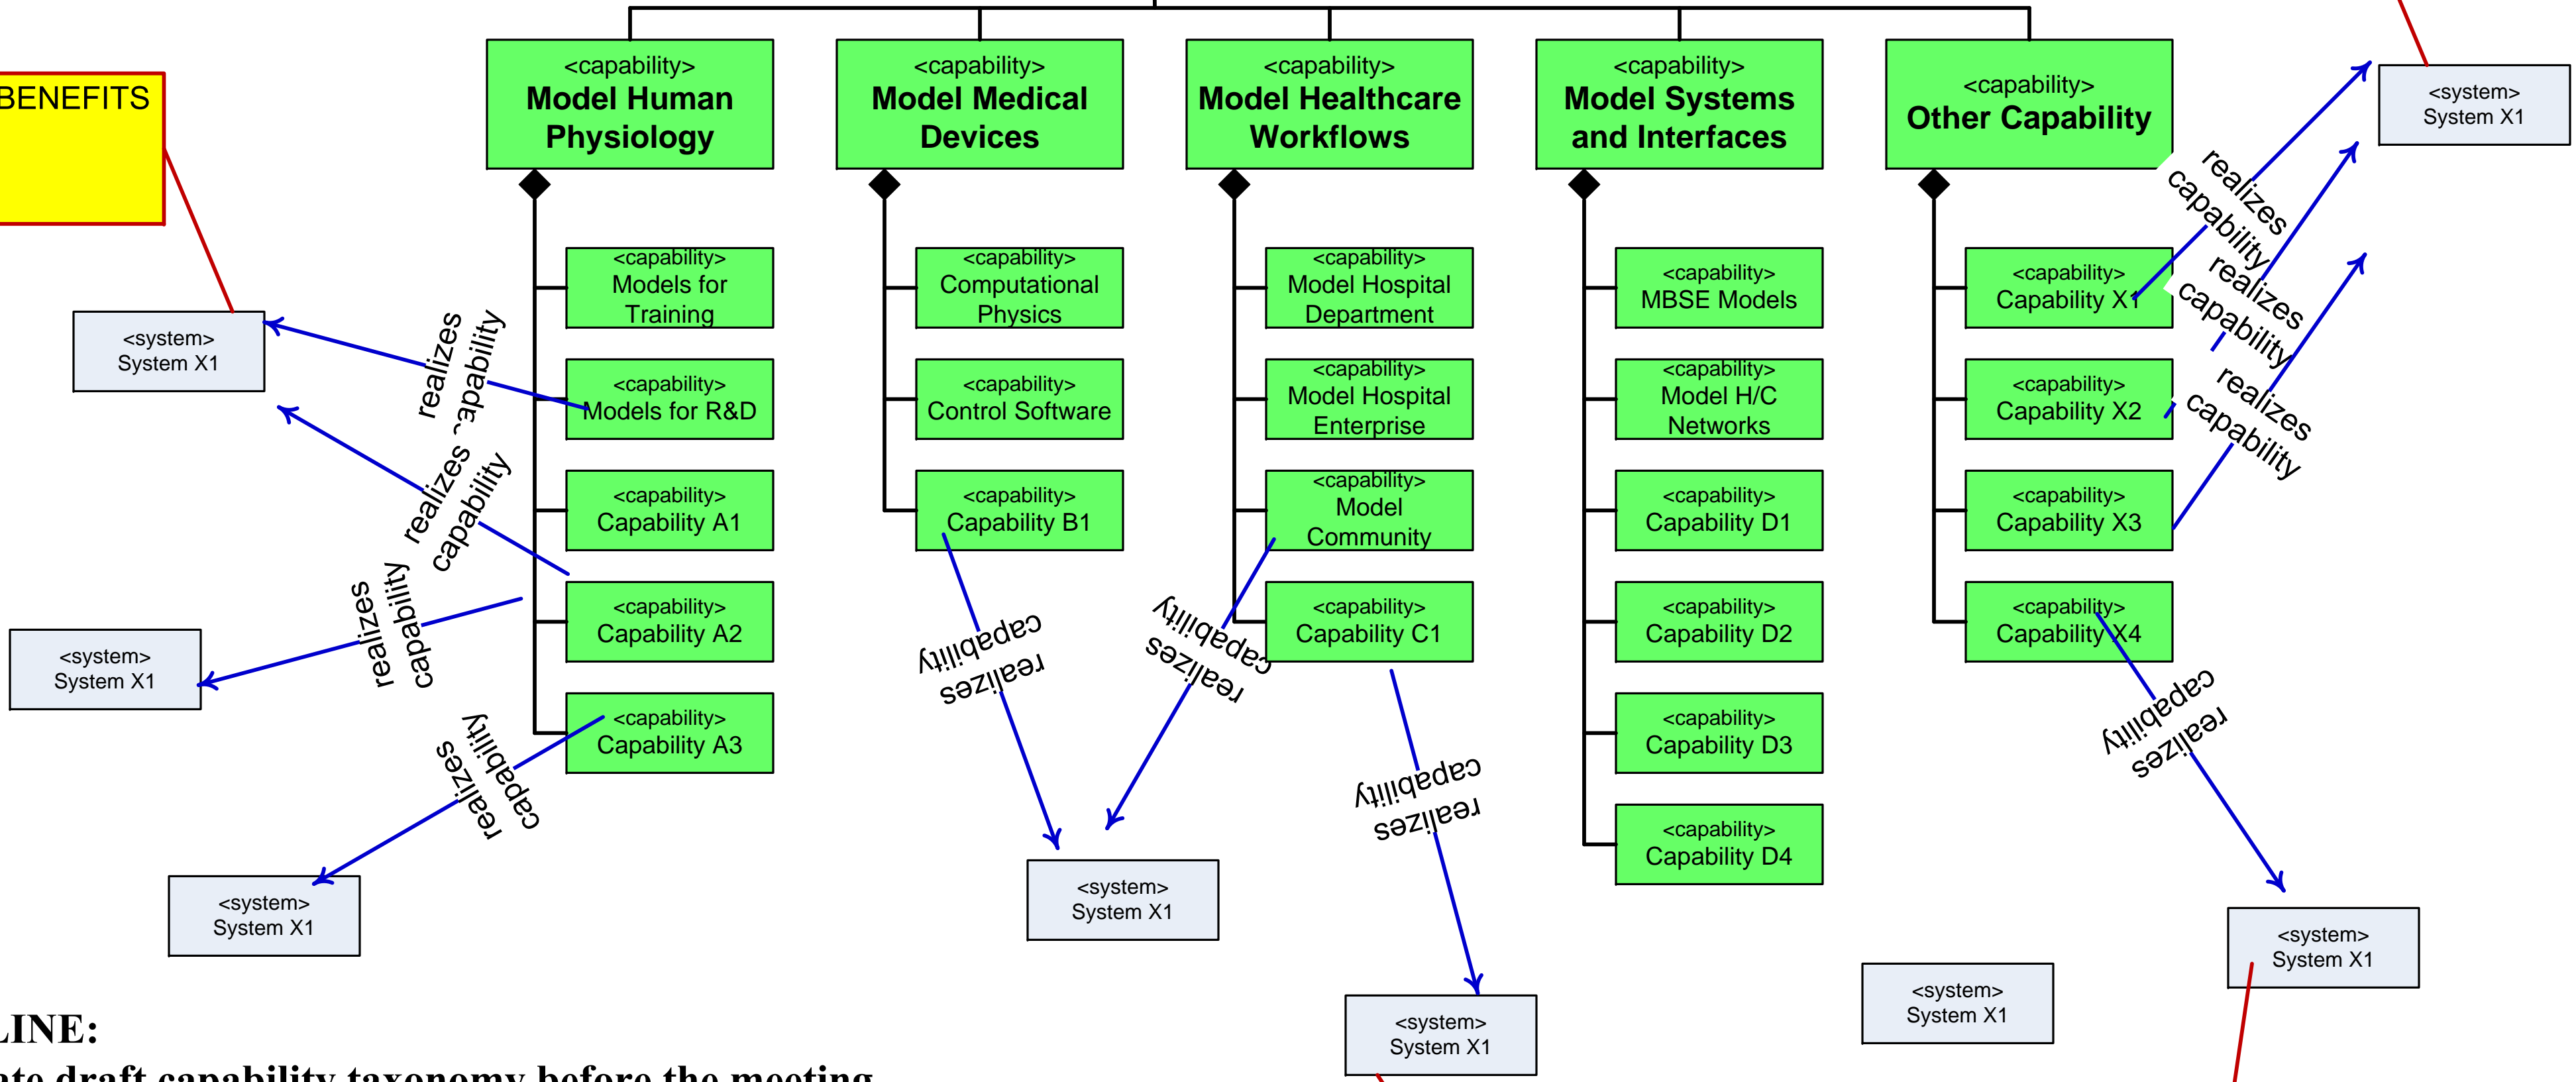

<capability>
Model Healthcare Systems and Operations to Improve Effectiveness, Efficiency, and Safety

- TBD

OUTLINE:

- Create draft capability taxonomy before the meeting
- Update draft based on presentations (engage presenters & attendees to update)
- Discuss with attendees relationship between the capabilities and the systems/problems from Session 1
- Facilitate attendees giving input on what systems are addressed and what the benefits are
