

FIBO v2 Specification Automation

Back to [start](#)

This page is for meeting notes, actions etc. relating to the FIBO version 2 automation.

This supplements a similar wiki page maintained by the EDM Council (requires EDM Council access, available on request).

Meeting Notes

The steering group for this activity meets on alternate Fridays at 3:30pm Eastern Time for 1 hour. Detailed activities happen i between these meetings, which are for progress, coordination and process decisions.

10 May 2019 [Meeting Notes](#)

26 April 2019 [Meeting Notes](#)

12 April 2019 [Meeting Notes](#)

29 March 2019 [Meeting Notes and Subsequent Email Follow-ups](#)

15 March 2019 [Meeting Notes](#)

19 Feb 2019 [Kick-off Meeting Notes](#)

Next Meeting: Friday 29 March 2019

Moving Parts

Starting with a meeting at the OMG meeting in Seattle, WA in December 2018, and a kick-off meeting on 19 Feb 2019, the following items come into play in supporting these requirements:

- Jira (EDM Council and OMG Jira)
- LaTeX for FTF/RTF Specification redline production
- CCM for production and maintenance of diagrams suitable for FIBO v2 Specification

The EDM Council 'Publish' process and the published products on <https://spec.edmouncil.org> interact with these processes in various ways that are to be described and maintained in the corresponding EDM Council wiki pages on the FPT Wiki space.

Ambitions

- Be able to produce and maintain documents in LaTeX
- Produce what is needed by F/RTF Reports using LaTeX

- Align and streamline Jira across OMG and EDMC
