

Shared Semantics

Workstream Summary

- **Goal:** Identification and evaluation of shared semantic models to avoid duplication of efforts and eliminate ambiguity
- **Success Criteria:** When all non-financial instrument/entity terms are traceable to a term owned by an industry/academic body and traceable to a relevant URI
- **Current Status:** Starting on Proof of Concepts for Address, then accounting (REA, XBRL)
- **Participant Profile:** Domain experts with experience in semantics

Team Leads:

- Mike Bennett
