

Shared Semantics

Workstream Summary

- **Goal:** Identification and evaluation of shared semantic models to avoid duplication of efforts and eliminate ambiguity
- **Success Criteria:** When all non-financial instrument/entity terms are traceable to a term owned by an industry/academic body and traceable to a relevant URI
- **Current Status:** Starting on Proof of Concepts for Address, then accounting (REA, XBRL)
- **Participant Profile:** Domain experts with experience in semantics

Team Leads:

- Mike Bennett

REA OWL Ontologies

Per recent correspondence from Bill McCarthy, the normative version of REA should be considered as being the UML model identified in the ISO documentation.

Meanwhile this is what MB has received, from Frederik Gailly in Feb 2011:
