

Extensions for DDS

[return to the DDS Family of Standards](#)

ddsrpc	defines a distributed services framework providing language-independent service definition and service/remote procedure invocation using DDS. Supports automatic discovery, synchronous and asynchronous invocations, and Qos.
ddxml	defines the XML syntax used to represent DDS-related resources. Provides XSD schema files for the DDS Quality of Service (Qos), DDS Data Types, and DDS Entities (DomainParticipants, Topics, Publishers, Subscriber, DataWriters and DataReaders).
