

b. Summary of Changes from 1.0

[return to Reference Architecture \(RA\)](#)

The major change is moving the content from a Microsoft Word document to a Wiki. This transition allows for content to be accessed on a section by section basis, easy cross-referencing of each section, and the ability to easily determine not only how many times a section is referenced, but also where. Specific changes done or in process include:

- A new section on technical and de facto standards (Appendix B): added
 - Data sheets for technical standards: added
 - Data sheets for de facto standards: being added
- Technical section
 - Reorganized into a series of technical views, citing relevant technical & de facto standards for each
 - As appropriate, tools to support technical views: added
- Taxonomy of data and nodes: added to Technical Views
- Governance for managing the DIDO Architecture: added
- Glossary of Terms (Appendix A): added
- A new section for tools (Appendix C): added
