b. Change Log

return to Front Matter

Changes made between version 2.0 and 1.0

The major change was moving the content from a Microsoft Word document to a Wiki. This transition allowed for content to be accessed on a section by section basis, easy cross-referencing of each section, and the ability to easily determine not only how many times a section is referenced, but also where. Specifically:

- Technical section
  o Reorganized into a series of technical views, citing relevant technical & de facto standards for each
  o As appropriate, tools to support technical views: added
- Taxonomy of data and nodes: added to Technical Views
- Governance for managing the DIDO Architecture: added
- Glossary of Terms (Appendix A): added
- A new section on technical and de facto standards (Appendix B): added
  o Data sheets for technical standards: added
  o Data sheets for de facto standards: added
- A new section for tools (Appendix C): added

Changes made between version 3.0 and 2.0

- Architectural Views & Governance (Sections 2 & 3): General clean-up and small additions, e.g., a new Technical View (Decentralized Finance (DeFi) Layers)
- Requirements (Section 4): added
- Glossary (Appendix A): expanded with additional terms
- Standards Organizations (Appendix B) - standards added and/or updated
- Hardware Architectures (Appendix C) - added
- Operating Systems (Appendix D) - added
- Tools (Appendix E) - no change
- DDS Quality of Service (Appendix F) - added, to be updated in 3.x
- Tests (Appendix G) - added
- Acronyms (Appendix H): expanded with additional entries
- Cognitive Model (Appendix I) - added
- Governance Model (Appendix J) - added
