

2.1.1 Platform View

[return to Stakeholder Views](#)

A **Platform** has a **community of interest (Col)** that is responsible for the DIDO infrastructure that resides on each **Node** in the **Node Network**. Direct involvement within a platform covers the gamut from observers, to passive users of the software, and significant contributors to the community or de facto standards (see: [3_node_tax](#)). As a general rule, **domains**, **ecosystems**, and **ecospheres** participate in platform communities rather than sponsor them. For the most part, platforms are already existing, self-contained communities with well established governance. Common Col activities are bug tracking, collaboration and voting on resolutions of problems and future directions.
