

## 2.2 Technical Views

[return to Architectural Views](#)

The Technical Views are intended to define at a high level the various parts and subparts of larger DIDO systems. It outlines generic parts, subparts and interconnections of those parts, and subparts for a DIDO system. For each of those parts or subparts, a list of potential standards, best practices, and tools is provided. There are multiple views, basically subdivided into two main areas:

- [2.2.1 Fundamental Views](#)
- [2-nodenet](#)
