

3.2 Legal Documents

[return to Governance](#)

□ [\[julie\] Ready for Revu!](#)

Given the intentional distributed, decentralized nature of DIDOS, along with the potential for them to run on hardware and/or use software not owned (hardware/software) or developed (software) by a single entity, it is important to employ a [community_of_interest_coi](#) approach to develop, manage, and govern DIDO solutions. Such an approach allows for the establishment and specification of requirements for a formal organization that balances the various goals of its participants in pursuit of a single shared mission and, at the same time, protects the joint [intelp](#) resulting from their collaboration.

When an organization is a joint venture between different legal entities, it must operate in accordance with legal documents that serve to manage the expectations of, govern the interactions between, and elaborate the collective and individual deliverables expected from the legal entities participating in that organization. In the context of DIDO, *Ecosphere* COI is the term used to refer to such a joint venture. Table 1 lists the legal documents required to formally launch an *Ecosphere Col*. These documents support the process described in [Stakeholder Communities](#). Depending on the country of incorporation, all three may be required for the *Ecosphere COI* to be formally incorporated. In general terms (more details provided in Sections 3.2.1, 3.2.2, and 3.2.3), the [charter](#) defines how the *Ecosphere COI* interacts with the outside world; the [bylaw](#) defines how it operates internally (i.e., fundamental governing rules, internal organization, etc.); [Policies & Procedures](#), a document required to be incorporated in the United States, establishes a set of principles to achieve the goals and vision of its charter and the specific methods employed to express these policies in action.

As already discussed in [Stakeholder Views](#), other types of *Col*s or [Special Interest Groups \(SIGs\)](#) can be formed under the umbrella of a parent *Ecosphere*: *Ecosystems* and *Domains*.¹⁾ As shown in Table 1, they must each be chartered according to the governing rules established in the Bylaws and abide by the P&P of their parent *Ecosphere Col*. *Ecosystem* P&Ps may include specific extensions to the Parent *Ecosphere*'s *Col*'s P&P. In like manner, *Domain* P&Ps may include specific extensions to the their parent *Ecosystem Col*'s P&P. All extensions to the parent P&P must be additive; they may not replace anything in the P&P of their parent *Ecosphere Col*.

Table 1: Documents required to Create and Govern a DIDO Col

DIDO Col	Charter	Bylaws	Policies and Procedures
Ecosphere	Yes(§)	Yes(†)	Yes(‡)
Ecosystem	Subcharter of Ecosphere	covered by Ecosphere	covered by Ecosphere + extensions
Domain	Subcharter of Ecosystem	covered by Ecosphere	covered by Ecosphere + extensions from Ecosystem _ local

- ((§) *Initially, a legal statement created by the founders of the organization that lays out goals, missions and officers for the organization*
- (†) *a legal document reviewed by lawyers from all the participating parties*
- (‡) *Some Policies and Procedures may be mandated by law (i.e., discrimination, ADA, Safety, etc., others are local added by local governing boards) and should be drafted/reviewed by lawyers of all*

participating parties

NOTE: There are no standards for these documents. The initial versions of these documents, particularly the Bylaws, should be drafted by attorneys. In the case of the P&P, the initial version should be drafted with input from attorneys to address legally mandated items.

- [3.2.1 Charter](#)
- [3.2.2 Bylaws](#)
- [3.2.3 Policies and Procedures \(P&P\)](#)

¹⁾

Described in more detail, along with illustrations, in [Ecosystem View](#) and [Domain View](#).
