

Deadline QoS

[Return to Glossary](#)

Deadline QoS is a significant parameter for periodic and aperiodic real-time critical communications. This represents the maximum separation between two [topic](#) updates. The [Data Writer](#) indicates that the application commits to write a new value at least once every deadline period. The [Data Readers](#) are notified by the [Data Distribution Service \(DDS\)](#) engine when the Deadline [Quality of Service \(QoS\) Policies](#) contract is violated.
