

# File

[Return to Glossary](#)

**File** is a container in a computer system for storing information. Files used in computers are similar in features to that of paper documents used in library and office files. There are different types of **Files** such as text files, data files, directory files, binary and graphic files, and these different types of files store different types of information. In a computer operating system, files can be stored on [Solid-State Drive \(SSD\)](#), [Hard Disk Drive \(HDD\)](#), [Network Attached Storage \(NAS\)](#), [Cloud Storage](#) or other types of storage devices.
