

File Transfer Protocol (FTP)

[Return to Glossary](#)

File Transfer Protocol (FTP) is a standard [Internet protocol](#) for transmitting files between computers on the [Internet](#) over TCP/IP connections. FTP is a [Client-Server Protocol](#) where a [Client](#) will ask for a file, and a local or remote [server](#) will provide it.

The end-users machine is typically called the local host machine, which is connected via the [Internet](#) to the remote host—which is the second machine running the FTP software.
