

# Ganache

[Return to Glossary](#)

**Ganache** is a personal [Blockchain](#) for rapid Ethereum and Corda distributed [dido:public:ra:xapend:xapend.a\_glossary:a:application]] development. **Ganache** can be used for across the entire development cycle; enabling the development, deployment, and testing [Distributed Application](#) (DApp or DApp) in a safe and deterministic environment.

**Ganache** comes in two flavors: a [Graphical User Interface \(GUI\)](#) and [Command Line Interface \(CLI\)](#). **Ganache** GUI is a desktop application supporting both Ethereum and Corda technology. The command-line tool, **ganache-cli** (formerly known as the **TestRPC**), is available for Ethereum development. Prefer using the command-line? This documentation will focus only on the GUI flavor of **Ganache**. Please see the **Ganache** CLI Readme for command-line documentation.

All versions of **Ganache** are available for Windows, Mac, and Linux.
