

Hypertext transfer protocol (HTTP)

[Return to Glossary](#)

Hypertext transfer protocol (HTTP) is a fundamental [Protocol](#) used on the [Internet](#) in order to control data transfer to and from a hosting [Server](#), in communication with a web browser [Client](#).

HTTP is the essential means of communication between web users and the servers that maintain the websites themselves.

See: [RFC7235 - Hypertext Transfer Protocol \(HTTP/1.1\): Authentication](#)
