

Open Platform Communication Unified Architecture (OPC-UA)

[Return to Glossary](#)

Open Platform Communication - Unified Architecture (OPC-UA) is an information exchange standard for Industrial Automation and related systems created by the OPC Foundation. The [Open Platform Communication](#) UA standard provides an Addressing and Information Model for Data Access, Alarms, and Service invocation layered over multiple transport-level protocols such as [Binary Transmission Control Protocol \(TCP\)](#) and [Web-Services](#).
