

Permissionless Networks

[Return to Glossary](#)

Permissionless Networks require no permission to use it. In other words, there is no barrier to entry to use it. Anyone can run a [node](#), run [mining](#) software/hardware, access a [wallet](#) and write data onto and transact within the [blockchain](#) (as long as they follow the rules of the blockchain). There is no way to censor anyone, ever, on the permissionless [bitcoin](#) blockchain.¹⁾

1)

“Permissioned vs. Permissionless blockchains: Who will win and will it matter?”, Dustin D, 22 March 2018, [Permissionless](#)
