

# Rich Site Summary (RSS)

[Return to Glossary](#)

**Rss** a web feed that allows users and applications to access updates to websites in a standardized, computer-readable format. These feeds can, for example, allow a user to keep track of many different websites in a single news aggregator. The news aggregator automatically checks the RSS feed for new content, allowing the list to be automatically passed from website to website or from website to user.

**Note:** Also known as Really Simple Syndication (RSS).
