

Shall (Requirement)

[Return to Glossary](#)

Shall Requirement - Shall is used to indicate a [requirement](#) that is contractually binding, meaning it must be implemented, and its implementation verified. Period! Don't think of "shall" as a word, but rather as an icon that SCREAMS: "This is a requirement." If a statement does not contain the word "shall" it is not a requirement.

Also see: [RFC2119 - Key words for use in RFCs to Indicate Requirement Levels](#)
