

Shared Resources

[Return to Glossary](#)

Shared Resources, also known as **Network Resources**, refer to computer data, information, or hardware devices that can be easily accessed from a remote computer through a [Local Area Network \(LAN\)](#) or enterprise [Intranet](#). Successful shared resource access allows users to operate as if the shared resource were on their own computer. The most frequently used shared network environment objects are files, data, multimedia and hardware resources like printers, fax machines and scanners.
