

Subscriber Identity Module (SIM)

[Return to Glossary](#)

Subscriber Identity Module (SIM) or **Subscriber Identification Module (SIM)**, widely known as a SIM card, is an [integrated circuit](#) that is intended to securely store the international mobile subscriber identity (IMSI) number and its related [key](#), which are used to identify and authenticate [subscribers](#) on mobile telephony devices (such as mobile phones and computers). It is also possible to store contact information on many SIM cards. SIM cards are always used on GSM phones; for CDMA phones, they are needed only for LTE-capable handsets. SIM cards can also be used in satellite phones, smart watches, computers, or cameras.
