

eXtensible Messaging and Presence Protocol (XMPP)

[Return to Glossary](#)

eXtensible Messaging and Presence Protocol (XMPP), or **Jabber**, is a communications [Protocol](#) that aims to help connect different kinds of messaging platforms or [Middleware](#). Built on [eXtensible Markup Language \(XML\)](#), this protocol is sometimes called “Jabber,” which is technically a service based on XMPP, and provides an open standard for engineering messaging compatibility.
