Source: [Log4j Scala 2.12 API](#) |

## Introduction

*Log4j Scala API for Scala 2.12 requires Log4j API, Java 8, the Scala runtime library, and the Scala reflection library. To use Log4j as a logging implementation, then Log4j Core must also be included. Instructions on using these dependencies are in the dependency information page, and additional information is included in the Log4j artifacts page.*
