## Abstract

Source: [go-ethereum Project](#)

*The go-ethereum client is commonly referred to as **geth**, which is the the command line interface for running a full ethereum node implemented in Go. By installing and running geth, you can take part in the ethereum frontier live network and:*

- *mine real ether*
- *transfer funds between addresses*
- *create contracts and send transactions*
- *explore block history*
- *and much much more*
