Description	http://www.ethdocs.org/en/latest/ethereum-clients/go-ethereum/index.html
Category	Client

Abstract

Source: [go-ethereum Project](#)

The go-ethereum [client](#) is commonly referred to as **geth**, which is the the command line interface for running a full ethereum node implemented in Go. By installing and running geth, you can take part in the ethereum frontier live network and:

- mine real ether
- transfer funds between addresses
- create contracts and send transactions
- explore block history
- and much much more
