| Category      | Interface                                                                                           |

## Summary

*This EIP formalizes an Ethereum Provider JavaScript API for consistency across clients and applications. The provider is designed to be minimal and is intended to be available on `window.ethereum` for cross environment compatibility.*
