

# RFC7061 - eXtensible Access Control Markup Language (XACML) XML Media Type

[return to the IETF Standards](#)

Table 1: Data sheet for eXtensible Access Control Markup Language (XACML) XML Media Type

Title	eXtensible Access Control Markup Language (XACML) XML Media Type
Acronym	XACML
Version	1981
Document Number	RFC7061
Release Date	November 2013 1981
Reference	<a href="https://tools.ietf.org/html/rfc7061">https://tools.ietf.org/html/rfc7061</a>

**Note:** The following is an excerpt from the official IETF RFC. It is provided here as a convenience and is not authoritative. Refer to the original document as the authoritative reference.

## Introduction

*The eXtensible Access Control Markup Language (XACML) [XACML-3] defines an architecture and a language for access control (authorization). The language consists of requests, responses, and policies. Clients send a request to a server to query whether a given action should be allowed. The server evaluates the request against the available policies and returns a response. The policies implement the organization's access control requirements.*
