

ISO/IEC 7816-11 Identification cards — Integrated circuit cards — Part 11: Personal verification through biometric methods

[return to the ISO Standards](#)

Table 1: Data sheet for Identification cards — Integrated circuit cards — Part 11: Personal verification through biometric methods

Title	Identification cards — Integrated circuit cards — Part 11: Personal verification through biometric methods
Acronym	
Version	2017
Document Number	7816-11
Release Date	2017
Reference	https://www.iso.org/obp/ui/#iso:std:iso-iec:7816:-11:ed-2:v1:en

Note: The following is an excerpt from the official ISO catalog. It is provided here as a convenience and is not authoritative. Refer to the original document as the authoritative reference.

Scope

This document specifies security-related interindustry commands to be used for personal verification through biometric methods in integrated circuit cards. It also defines the data structure and data access methods for use of the card as a carrier of the biometric reference and/or as the device to perform the verification of the cardholder's biometric probe (on-card biometric comparison). Identification of persons using biometric methods is outside the scope of this document.
