**Note:** The following is an excerpt from the actual document. It is provided here as a convenience and is not authoritative. Refer to the original document as the authoritative reference.

## Scope

*This specification defines the vocabulary and rules (see Clauses 7 through 21) for documenting the [semantics](#) of business vocabularies and business rules for the exchange of business vocabularies and business rules among organizations and between software tools.*

*This specification is interpretable in predicate logic with a small extension using modal operators. It supports linguistic analysis of text for business vocabularies and business rules, with the linguistic analysis itself being outside the scope of this specification.*
