

# Technical Standards Bodies

[return to Standards Area](#)

Technical standards are developed by [Standards Organizations](#)<sup>1)</sup>. Standards organizations are organizations whose primary activities are to develop, coordinate, promulgate, revise, amend, reissue, interpret, or otherwise produce technical standards intended to address the needs of a group of affected adopters.<sup>2)</sup>

The DIDO RA provides data sheets for technical standards developed by the following organizations:

No pages in this namespace.

<sup>1)</sup>  
also known as [standards body](#), [Standards Developing Organization \(SDO\)](#), or [Standards Setting Organization \(SSO\)](#)

<sup>2)</sup>  
Intercloud: Solving Interoperability and Communication in a Cloud of Clouds, Appendix A, by Ken Owens, Monique Morrow, Venkata Josyula, Jazib Frahim, Publisher: Cisco Press Release Date: June 2016 ISBN: 9780134189239, <https://learning.oreilly.com/library/view/intercloud-solving-interoperability/9780134189239/app01.html>
