

# Azure Sphere OS

[Return to Operating Systems](#)

**Azure Sphere OS** is a custom Linux-based [microcontroller operating system](#) created by Microsoft to run on an Azure Sphere-certified chip and to connect to the Azure Sphere [Security Service](#). The Azure Sphere OS provides a [platform](#) for [Internet of Things application](#) development, including both high-level applications and real-time capable applications. It is the first operating system running a Linux kernel that Microsoft has publicly released and the second [Unix-like](#) operating system that the company has developed for external (public) users, the other being Xenix.
