Archiving and Release Management

Return to Tools

Source: Tools for managing open source programs

- ***Artifactory*** *– Artifactory is a repository manager from JFrog which supports software packages created in any code language. It integrates with all major DevOps and continuous integration and continuous deployment tools. Artifactory is available as a commercial or as an open source tool. https://www.jfrog.com/artifactory/*
- ***Bintray*** *– A commercial archiving tool from JFrog that allows companies to publish their code release archives to maintain storage for older and larger files. https://bintray.com/*
- ***Docker Hub*** *– A cloud-based registry service which allows users to link to code repositories and build and test their images. It also stores manually-pushed images and links to Docker Cloud so users can deploy images to project hosts. Docker Hub is a centralized resource for container image discovery, distribution and change management, collaboration and workflow automation throughout the development pipeline. https://hub.docker.com/*
- ***github-release*** *– The open source, built in functionality part of GitHub which lets users package and edit releases of projects on GitHub so they are available for use by other community members. https://github.com/aktau/github-release*
