

## F.2 Topic Data

[Return to DDS Quality of Service](#)

The TOPIC\_DATA QoS allows the [application](#) to attach additional information to the created [Topic](#) such that when a remote application discovers their existence it can examine the information and use it in an application-defined way. In combination with the listeners on the `DataReader` and `DataWriter` as well as by means of operations such as `ignore_topic`, these QoS can assist an application to extend the provided QoS.
