

Part II: User Scenarios

[Return to the Book Beginning](#)

The purpose of these scenarios is to provide some tests contexts for the DIDO Command Line Interfaces ensuring that the CLI functionality can meet the overall business flow associated with each of the scenarios. The Scenarios are not rigorous and if actually executed would require more details and it makes no judgement about other solutions that do not use DIDOs that can meet these same scenarios.

Create a User Scenario with the name Name or Expression HERE →	You are not allowed to add pages
