

Security Measure

[Return to Glossary](#)

The **Security Measure** assesses the degree to which an [application](#) protects information and data so that persons or other products or systems have the degree of data access appropriate to their types and levels of authorization (ISO 25010). [Security measures](#) the risk of potential security breaches due to poor coding and architectural practices. Security problems have been studied extensively by the [Software Assurance](#) community and have been codified in the [Common Weakness Enumeration \(CWE\)](#).
