| Specification | <a href="http://eips.ethereum.org/EIPS/eip-1474#Specification">http://eips.ethereum.org/EIPS/eip-1474#Specification</a> |
| Category      | Interface                                                                                                               |

### Simple Summary

*This proposal defines a standard set of remote procedure call methods that an [Ethereum node](#) should implement.*

### Abstract

*[Nodes](#) created by the current generation of Ethereum clients expose inconsistent and incompatible [RFC1831 - Remote Procedure Call Protocol Specification Version 2 \(RPC\)](#) methods because no formal Ethereum RPC specification exists. This proposal standardizes such a specification to provide developers with a predictable Ethereum RPC interface regardless of underlying node implementation.*
