Purpose:

This document includes three Dimensional Models that have been submitted as part of the Property and Casualty Insurance submission. A Claims, Premium, and Taxes and Fees model are included in this document. These models are designed to provide uses of the P&C Insurance Data Model with a representative starting point for developing specific purpose-built models. As such, these models are a generic representation of the P&C Model for the Claims, Premium, and Taxes and Fees data.

Claims Dimensional Model – Dimensional model designed to support a variety of analysis activities for the Claims domain.
Premium Dimensional Model – Dimensional model designed to support a variety of analysis activities for Account Premium.
Taxes and Fees Dimensional Model – A Dimensional model used for performing analysis of Taxes and Fees paid by P&C insurance carriers.
